## Training and Certification Programs

Non destructive Testing is the Basic Inspection Methods to Ensure the Quality. NDT is been Used in Oil & Gas, Petroleum Refinery, Power Plant, Chemical, Cement Industries. Ship Building Etc.

NIS Conducting NDT courses Includes Theoretical Lecture and Practical Sessions According to Guidelines of American Society of Non Destructive Testing's SNT-TC -1A Each part has a written examination & Practical Exposure. Success full completion of the exams and Continual Assessments are Awarded with a Certificate by **ASNT Level-III**.

### SNT-TC- 1A. NDT Level II courses are conducting the following testing

- Ultrasonic Testing.
- Magnetic Particle Testing.
- Penetrant Testing.
- Radiographic Testing.
- Eddy Current Testing.
- Radiographic Film Interpretation.
- Visual Testing.
- Ultrasonic Flaw Detection-  
Specialized course for UT Practical

### Welder's Qualification

Welder's training, Qualification & Certification also carried out by NIS in accordance with ASME Section IX and as per clients requirements

Welders who certified by the technical colleges may not have a qualification to perform Welding in the Petrochemical or in all other code mandated Industries. In order to perform welding in above area, the welders are required to be qualified based on the code required standards.

NIS has experience faculties and training personnel's to train welder and qualify the welders with qualified welding Inspectors based on the NIS Company written procedure.

Upon completion of the Qualification, welders may carry out welding in all Industrial components with satisfying clients Requirements after completing client's tests.
